PROFESSIONAL SUMMARY

Computer Engineering student at Bahria University Islamabad (CGPA 3.28) working toward a career in AI and software engineering. Proficient in Python, React, JavaScript, C++ and SQL, with shipped project work spanning AutoML dashboards, blockchain applications and browser extensions. Completed a cybersecurity internship at Safe City Islamabad covering web application security, vulnerability assessment and penetration-testing fundamentals. Top-15 National Finalist, Huawei ICT Competition 2024-25. Seeking a software engineering or AI/ML internship where I can ship production features.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Java, Solidity, SQL, HTML5, CSS3

Frontend & Web: React.js, Next.js, Tailwind CSS, Responsive Design, WordPress

Blockchain: Solidity, Smart Contracts, Hardhat, Ethers.js, MetaMask

AI / ML: Classification, Clustering, AutoML, Data Preprocessing, scikit-learn, Prompt Engineering

Cybersecurity: Web App Security, Vulnerability Assessment, Burp Suite, Cryptography, Networking, Linux

Databases & Tools: SQL Server, MySQL, JDBC, ER Modelling, Git, GitHub, MATLAB, Figma

PROFESSIONAL EXPERIENCE

Marketing Intern

Aug 2026 – Present | Islamabad, Pakistan

Mercantile Pakistan

- Run technical website audits using Google Lighthouse and PageSpeed Insights, diagnosing load performance, responsiveness and Core Web Vitals issues.
- Analyse advertising and campaign performance data, producing structured reports and recommendations for the marketing team.

Cybersecurity Intern

May – Jun 2026 | Islamabad, Pakistan

Safe City Islamabad — Supervisor: Faraz Memon, Director Systems

- Performed penetration-testing exercises and vulnerability assessments in controlled environments using Burp Suite, TryHackMe and the PortSwigger Web Security Academy.
- Reviewed web applications for SQL injection, cross-site scripting, broken authentication and security misconfiguration.
- Delivered technical presentations on phishing, web application security and vulnerability assessment.

IT Recruiter

Jan 2026 – Present | Hybrid / Remote

Atlas IT Services — Germany

- Source and screen IT candidates for a Germany-based startup, owning communication from outreach through interview scheduling.
- Evaluate technical profiles against role requirements, applying an engineering background to assess stack fit.

IT Assistant

Mar 2024 – Present | Islamabad, Pakistan

PMEye Management Consulting, Intl. — Part-time

- Maintain the company website and produce branding, announcement and portfolio materials for digital channels.

SELECTED PROJECTS

Smart AutoML Pro — Automated ML Dashboard *Python | scikit-learn | pandas | Streamlit*

Dashboard taking raw datasets through the full ML workflow — preprocessing, model selection, training and evaluation — for classification and clustering, without rewriting the pipeline per dataset. Deployed at smart-automl-dashboard.streamlit.app

Smart Campus Delivery Robot — Classical AI Search *Python | Streamlit | matplotlib | pandas*

Six search algorithms implemented from first principles — BFS, DFS, Uniform Cost, A* with configurable Manhattan/Euclidean heuristics, Greedy Best-First and Hill Climbing — plus reflex, goal-based and utility-based agents. Runs all six on the same scenario and compares success rate, path cost, nodes expanded and runtime across 10 test cases.

MediChain — Blockchain Medical Records System *Solidity | Hardhat | Ethers.js | Next.js | Tailwind*

Decentralised medical record system with access control enforced at the smart contract level. Role-based permissions for admin, doctor and patient, so a doctor reads only explicitly granted records while patients retain ownership of their data.

EngageWise — AI Writing Assistant (Chrome Extension) *JavaScript | Manifest V3 | Node.js | Express | LLM APIs*

Chrome extension that helps users draft better professional posts and replies. Injects a writing assistant into the page, sends surrounding context to an LLM API and returns suggested drafts the user reviews and edits before posting.

HRMS — Human Resource Management System *Java 11 | Maven | SQL Server | JDBC*

Database-backed HR system for employees, departments, designations, salaries and attendance. Resolved a circular foreign key between Departments and Employees by deferring the constraint, made the schema idempotent for clean re-runs, used soft deletes to preserve history, and pushed validation into CHECK constraints rather than application code. A DAO layer isolates all SQL from business logic.

Speech Enhancement — Digital Signal Processing *MATLAB*

Noise reduction and speech enhancement pipeline on recorded audio, with signal-quality evaluation applying core DSP filtering principles.

EDUCATION

BS Computer Engineering — Bahria University Islamabad

2023 – 2027

CGPA: 3.28 | Coursework: Data Structures & Algorithms, AI & Machine Learning, Computer Architecture, Operating Systems, Computer Networks, Database Systems, Digital Signal Processing, Blockchain

Intermediate, FSc Pre-Engineering — Metropolitan International United College, Islamabad

2021 – 2023

Matriculation (Science) — Dr. A.Q. Khan School System, Islamabad

2018 – 2021 | 89%

CERTIFICATIONS & ACHIEVEMENTS

- Huawei ICT Competition 2024-25 — Top-15 National Finalist, Pakistan (Dec 2024)
- Google Project Management Certificate — Google / Coursera (Jul 2025) · ID: HYS5HUKZAOV5
- Google Prompting Essentials Specialization — Google / Coursera (Jul 2025) · ID: 0SRCPWQKWSO5
- Build a Full Website Using WordPress — Coursera Project Network (Jul 2025) · ID: IUR4QX0R2A5Q
- Search Engine Optimization with Squarespace — Coursera Project Network (Jul 2025)

LEADERSHIP & VOLUNTEERING

Director of Management — BUILDS Society, Bahria University

Event planning and coordination for Voice & Verse, speaking and writing competitions, and student engagement activities.

Operations, 3rd Parliamentary Debates — BU Debates Society

Logistics, scheduling and coordination for a two-day inter-university debate competition.

Finance Coordinator — Dast-e-Khuddam

Budgeting, fund records and resource coordination for Ramadan welfare drives and orphanage support programmes.

Humanitarian Volunteer — iHayaat | Apka Tauhfa

Buner flood response — food distribution, financial assistance and basic medicines for affected families.

Languages: English (Advanced) | Urdu (Advanced) | Pashto (Advanced)
